Product Characteristics

These Structured Products („Certificates“/„Products“) with Cap are financial instruments which, depending on the Product's set-up, guarantee full or limited capital protection and which also allow a participation in the positive performance of the Underlying up to a defined price level (Cap). This Product is aimed at investors who expect a positive performance of the Underlying and who do not exclude, that major market corrections may occur.

Pay-off-Chart on the Maturity Date

Redemption

Each holder of a Certificate qualifies for redemption on the Redemption Date by the Issuer in accordance with the following redemption scenarios:

Scenario 1

The Product will be redeemed at an amount equal to the Capital Protection of the Nominal Amount, should the Closing Price of the Underlying be at or below the Strike Price on the Maturity Date.

$$\text{Closing Price of the Underlying} = \text{Reference Level} \times \left[\sum_{i=1}^N w_i \cdot \frac{P_i^{Mat}}{P_i^{Fix}} \right]$$

whereas,

P_i^{Mat}	Average net sale price realised for the share i during the Final Fixing
P_i^{Fix}	Average net purchase price realised for the share i during the Initial Fixing
w_i	Weighting of share i in the Underlying
N	Number of shares in the Underlying (i to N)

Scenario 2

Should the Closing Price of the Underlying be between the Strike Price and the Cap Level on the Maturity Date, the investor will receive an amount equal to the Capital Protection of the Nominal Amount, plus 100.00% of the positive performance of the Underlying between the Strike Price and the Closing Price multiplied with the nominal. The positive performance is calculated as follows:

$$\text{Positive performance} = (\text{Closing Price of the Underlying} - \text{Strike Price}) / \text{Strike Price}$$

Scenario 3

Should the Closing Price of the Underlying be at or above the Cap Level on the Maturity Date, the investor will receive 150.00% of the Nominal Amount.

Taxation

Stamp duties	No stamp duty upon issuance. Federal turnover tax is due on secondary market transactions in case the Product's term exceeds one year.
Withholding tax	No Swiss withholding tax.
Income tax	The Product is classified as transparent, where the preponderant part of the return of the bond part is in the form of a discount (IUP). For private investors (individuals) with tax residence in Switzerland the difference between the Capital Protection and its present value at issue (USD 1'000.00 – USD 919.17 = USD 80.83, IRR 1.70% p.a.) is subject to income tax ("Modifizierte Differenzbesteuerung"). However, any gain derived from the option part is classified as capital gain and therefore for such investors not subject to income tax.
EU Savings tax	For Swiss paying agents, this Product is not subject to the EU Savings tax. (TK 2)

The aforementioned taxes are valid at the time of launch of this issue. The relevant tax laws or regulations of the tax authorities may change at any time. Furthermore the tax treatment may depend on the personal situation of the investor and may be subject to change in the future. This information is not purported to be a complete description of all potential tax effects. Potential investors are advised to consult their tax advisors to determine the special tax consequences of the purchase, ownership or disposition of this Product.

Prospects of Profit and Loss

Pursuant to the categorisation model of the Swiss Structured Products Association (SSPA), this Product is to be considered a capital protection product. Subject to the issuer risk (see "1. Issuer Risk" below) and other extraordinary events (see "Early Redemption" below), the investor's potential loss on the Redemption Date is limited to the difference between the Issue Price and the defined capital protection (see Capital Protection under "Terms"). This loss occurs if the Closing Price of the Underlying is at or below the Strike Price on the Maturity Date. Further, the positive performance of the Product and, accordingly, the possibility to realise a high profit is limited by the cap feature (see "Cap Level" above). During the term of the Product, its value is, in particular, influenced by the performance of the Underlying and the general development of interest rates and may be substantially lower than the Capital Protection (see "Secondary Market" below). As past performance is no guarantee of future development, the performance cannot be predicted at the time of the investment decision.

This risk disclosure is not exhaustive. It cannot identify all Product specific risks. The investor is advised to consult its client advisor as to the Product specific risks and to peruse the "Risk Factors" section of the Program Documentation.

Significant Risks for Investors

1. Issuer Risk

Unlike in a collective investment scheme, investors in structured products are not protected by a segregated pool of assets upon the Issuer's bankruptcy. Accordingly, the investment instrument's value is not only dependent on the development of the Underlying or values covered by the Underlying, but also on the credit-worthiness of the Issuer, which may vary over the term of the structured product. In case of the issuer's insolvency or bankruptcy the investors in structured products may lose their entire investment. This Product is a direct, unconditional and unsecured obligation of the Issuer and ranks equally with all other direct, unconditional and unsecured obligations of the Issuer.

2. Risks of Derivative Products

Derivative products are complex financial instruments, may therefore involve a high degree of risk and are intended for use only by sophisticated investors who are capable of understanding and assuming the risks involved. Before entering into any transaction, an investor should determine if this Product is suitable with regards to the particular circumstances and should independently assess (together with the client advisor) the specific risks as described under "Product Risks" and any other legal, regulatory or credit consequences. The Issuer makes no representation as to the suitability or appropriateness of this Product for any particular investor. This document does not replace a personal discussion with your client advisor, which is tailored to your requirements, investment objectives, experience, knowledge and circumstances and which is recommended by the Issuer before the investment decision. Please ask your client advisor about supporting information regarding this Product such as the Programme Documentation.

Structured Products: Owning this Product is not the same as owning the Underlying or values covered by the Underlying. Accordingly, changes in the market value of the Underlying or the values covered by the Underlying may not result in a comparable change in the market value of the Product. Further, commissions, fees and other remunerations may reduce the actual market value. The trading market may be volatile and adversely impacted by many events which may include, but are not limited to, political events, corporate actions and macro economic factors.

Price fixing: The market value of the Underlying may be fixed outside the trading hours of the relevant stock exchange. The investor must be aware that the market value of the Underlying determined outside the trading hours of the relevant stock exchange can be subject to great volatility.

Secondary Market: Trading of the Product may be limited despite a possible listing. Investors must also be aware of the spread risk. This means that during the term of the Product, bid and offer prices may possibly differ to a greater or lower extent. Although the Lead Manager intends to provide market making subject to normal market conditions, he is not obliged to do so. Further the investor may only be able to sell its Product in the secondary market at a lower price than the original purchase price.

Early Redemption: The investors must be aware of a possible early redemption of the Product. The Issuer has the right in the case of an extraordinary event to call the Products for settlement, provided that the Issuer will use such efforts as it reasonably deems practical to preserve the value of, or provide reasonable value for, the Product.

Currency Risk:

It is explicitly referred to the fact that the investor is secured against the currency risk resulting from the fact that the Currency of the Certificate does not correspond to the Underlying's currency or the assets covered by the Underlying's currencies. However the investor may be exposed to a currency risk, if the Product is denominated in another currency than that of the country in which the investor is resident. The investment is therefore exposed to currency fluctuations and may increase or decrease in value.

Further Information: For further details on Product related risks please consult the risk disclosure brochure "Special Risks in Securities Trading" (Edition 2008) which is available on the Swiss Bankers Association's website: www.swissbanking.org/en/home/shop.htm or may be obtained from your client advisor upon request.

2. Conflicts of Interest

Bank Julius Baer & Co. Ltd. and affiliated companies may from time to time enter into transactions for their own account or for the account of a client that are related to the Product. These transactions may not be intended for the benefit of the investor and may have positive or negative effects on the Underlying(s) or values covered by the Underlying and thus on the value of the Product. Companies affiliated to the Issuer and third parties may also become counterparties in hedging transactions. Accordingly, conflicts of interest may therefore arise with regard to obligations relating to the ascertainment of the values of the Product and other related valuations both between the companies affiliated to the Issuer and the investor and between third parties and the investors. In such events, Bank Julius Baer & Co. Ltd. will devote its best efforts to provide fair treatment of such conflicts.
