Shares, bank debt securities (e.g. interest bearing bank bonds and certificates) as well as other claims against financial institutions are subject to special regulations such as the "Bank Recovery and Resolution Directive" and the "Single Resolution Mechanism Regulation". These regulations can have a negative effect for the investor / contractual partner of the financial institution in case of a default and the necessity of a resolution of the financial institution. For further details, please refer to: www.juliusbaer.com/legal-information-en. Without prejudice to the generality of the foregoing, the following highlights certain aspects, risks and characteristics of some of the asset classes mentioned in this publication.

Insofar as **contingent convertible bonds (so-called "CoCo bonds")** are mentioned in this publication, please note that the German securities regulator (BaFin – Federal Financial Supervisory Authority) does not regard CoCo bonds as a suitable investment for private clients due to their complex product structure, their intended use, the fact that they are difficult to value and the potential conflict of interest on the part of the bank. Private clients wishing to purchase CoCo bonds on their own initiative should carefully consider the specific features and risks involved when making their decision. According to the Product Intervention (Contingent Convertible Instruments and Mutual Society Shares) Instrument 2015, enacted by the U.K. Financial Conduct Authority ("FCA"), this/these product(s) must not be purchased by retail investors domiciled in the European Economic Area ("EEA" – EU, Liechtenstein, Norway and Iceland), unless one of the following conditions is met: annual income of at least GBP 100,000 (or equivalent) or net assets (excluding property, insurance and other benefits) of at least GBP 250,000 (or equivalent) at disposal.

Structured products (e.g. baskets, certificates) are complex financial products and therefore involve a higher degree of risk. They are intended for investors who understand and are capable of assuming all risks involved. Structured products may therefore only be sold to experienced investors and require additional advice regarding the products specific risks. The value of the products is not only dependent on the development of the underlying, but also on the creditworthiness of the issuer, which may vary over the term of the product. In case of the issuer's insolvency or bankruptcy, the investor in the product may lose his entire investment. Before entering an investment all documents related to the issue of the described structured product have to be read. The full terms of the respective structured product may be obtained free of charge. Investments in funds mentioned in this publication should only be made after a thorough reading of the current prospectus, the current Key Investor Information Document or simplified prospectus, the fund regulations or articles of association and the latest annual and semi-annual reports. These documents can be obtained free of charge upon request. The value of the units and the return they generate can go down as well as up. Performance values are calculated without taking account of commissions and costs that result from selling and buying back investments.
