**Product Characteristics**

These Structured Products („Certificates“/ „Products“) are financial instruments which due to an implied Leverage allow the investor to disproportionately participate in the positive performance of the Underlying, but which also reflect the development of the Underlying disproportionately if its performance is negative. This Product is aimed at investors who expect a positive performance of the Underlying.

**Implied Leverage Effect**

Any changes in the value of the underlying will have a disproportionate effect on the value of the certificate due to the implied leverage which is a function of the ratio.

## Redemption

Each holder of a Certificate qualifies for redemption on the Redemption Date by the Issuer in accordance with the following redemption scenario:

### Scenario

The Certificate will be redeemed on the Redemption Date according to the following formula:

$$\text{Redemption} = N \times \text{Ratio} \times \text{Sum}[\max(0; BW_i) \times \Delta t_i]$$

whereas:

N	Nominal
BW <sub>i</sub>	Reference Value of Underlying at Observation Date i
Δt <sub>i</sub>	Number of interest days of the interest period i divided by the year days based on the applied Method of interest rate calculation

## Value of the Certificate

The Value of the Certificate is calculated analogically to the Redemption Amount whereby instead of the Value of the Underlying at Redemption Date will be used the actual Value of the Underlying.

## Prospects of Profit and Loss

The total yield of the Product depends on the performance of the Underlying. **The leverage effect of the Product affects its performance disproportionately (see Leverage above)** and, accordingly, a comparatively low negative performance of the Underlying may result in larger losses for the investor. As past performance is no guarantee of future development, the performance cannot be predicted at the time of the investment decision. A total loss may occur if this Underlying has no value on the Maturity Date (if its Price is zero).

This risk disclosure is not exhaustive. It cannot identify all Product specific risks. The investor is advised to consult its client advisor as to the Product specific risks and to peruse the "Risk Factors" section of the Program Documentation.

## Significant Risks for Investors

### 1. Issuer Risk

Unlike in a collective investment scheme, investors in structured products are not protected by a segregated pool of assets upon the Issuer's bankruptcy. Accordingly, the investment instrument's value is not only dependent on the development of the Underlying or values covered by the Underlying, but also on the creditworthiness of the Issuer, which may vary over the term of the structured product. In case of the issuer's insolvency or bankruptcy the investors in structured products may lose their entire investment. This Product is a direct, unconditional and unsecured obligation of the Issuer and ranks equally with all other direct, unconditional and unsecured obligations of the Issuer.

### 2. Risks of Derivative Products

Derivative products are complex financial instruments, may therefore involve a high degree of risk and are intended for use only by sophisticated investors who are capable of understanding and assuming the risks involved. Before entering into any transaction, an investor should determine if this Product is suitable with regards to the particular circumstances and should independently assess (together with the client advisor) the specific risks as described under "Product Risks" and any other legal, regulatory or credit consequences. The Issuer makes no representation as to the suitability or appropriateness of this Product for any particular investor. This document does not replace a personal discussion with your client advisor, which is tailored to your requirements, investment objectives, experience, knowledge and circumstances and which is recommended by the Issuer before the investment decision. Please ask your client advisor about supporting information regarding this Product such as the Programme Documentation.

**Interest Rates:** The trends of interest rates in a country are influenced by various factors. Amongst others are the trade cycle, public finances, price level, the international flow of funds as well as developments in other countries. The yield curve on the other hand which can be observed on the capital markets is influenced by factors like preferences of market participants, expectations of investors, inflation rate, etc. A prediction of interest rates trends can be subject to greater uncertainties.

**Structured Products:** Owning this Product is not the same as owning the Underlying or values covered by the Underlying. Accordingly, changes in the market value of the Underlying or the values covered by the Underlying may not result in a comparable change in the market value of the Product. Further, commissions, fees and other remunerations may reduce the actual market value. The trading market may be volatile and adversely impacted by many events which may include, but are not limited to, political events, corporate actions and macro economic factors.

**Price fixing:** The market value of the Underlying may be fixed outside the trading hours of the relevant stock exchange. The investor must be aware that the market value of the Underlying determined outside the trading hours of the relevant stock exchange can be subject to great volatility.

**Secondary Market:** Trading of the Product may be limited despite a possible listing. Investors must also be aware of the spread risk. This means that during the term of the Product, bid and offer prices may possibly differ to a greater or lower extent. Although the Lead Manager intends to provide market making subject to normal market conditions, he is not obliged to do so. Further the investor may only be able to sell its Product in the secondary market at a lower price than the original purchase price.

**Early Redemption:** The investors must be aware of a possible early redemption of the Product. The Issuer has the right in the case of an extraordinary event to call the Products for settlement, provided that the Issuer will use such efforts as it reasonably deems practical to preserve the value of, or provide reasonable value for, the Product.

**Currency Risk:** The investor may be exposed to a currency risk, if the Underlyings are denominated in other currencies than the nominal of the Product or the Product is denominated in another currency than that of the country in which the investor is resident. The investment is therefore exposed to currency fluctuations and may increase or decrease in value.

**Further Information:** For further details on Product related risks please consult the risk disclosure brochure "Special Risks in Securities Trading" (Edition 2008) which is available on the Swiss Bankers Association's website: [www.swissbanking.org/en/home/shop.htm](http://www.swissbanking.org/en/home/shop.htm) or may be obtained from your client advisor upon request.

## 2. Conflicts of Interest

Bank Julius Baer & Co. Ltd. and affiliated companies may from time to time enter into transactions for their own account or for the account of a client that are related to the Product. Companies affiliated to the Issuer and third parties may also become counterparties in hedging transactions. Accordingly, conflicts of interest may therefore arise with regard to obligations relating to the ascertainment of the values of the Product and other related valuations both between the companies affiliated to the Issuer and the investor and between third parties and the investors. In such events, Bank Julius Baer & Co. Ltd. will devote its best efforts to provide fair treatment of such conflicts.
